

Vibra-Tector™

Pulse Induction Metal Detector **730**

Designed For Any Environment!

The Vibra-Tector 730 is a state of the art handheld metal detector that communicates with pulses of vibration and light, incorporates Pulse Induction (PI) technology and is waterproof to a depth of 100 feet.

The self-calibrating microprocessor controlled circuitry requires no adjustments. The unique sealed design allows detecting in any environment including grass, mud, dirt, sand, black sand, or even in fresh or salt water.

Features

- **Communicates with vibration & light** - When a target is located the Vibra-Tector 730 signals with pulses of vibration and flashes of bright light from a white L.E.D.
- **Pulse Induction (PI)** - This technology allows hunting at the beach in salt water or in any type of soil, including black sand.
- **Detection depth stability** - New advanced circuitry maintains the units detection depth ability throughout the life of the battery.
- **Target distancing** - The pulses of vibration and light will continue to increase in quantity as the coil gets closer to the target.
- **Automatic tuning** - The state of the art microprocessor controlled design requires no adjustments of any kind.
- **Tilt On/Off** - The Vibra-Tector 730 uses an easy tilt on/off system that eliminates the need for fragile push button switches.
- **Waterproof** - Unique sealed design can be used in almost any environment including fresh or salt water to a depth of 100 feet. This makes the Vibra-Tector an ideal tool for divers or the beach.
- **Low battery indicator** - Built in low battery sensor alerts you when the battery is low and needs replacing.
- **Easy battery installation** - The standard nine-volt battery is quickly changed without tools. Simply rotate the rear knob and pull out the compression seal to access the battery compartment.
- **Compact design** - Because of its compact 4 inch coil, and small overall size, the Vibra-Tector 730 is easy to carry and can fit in almost any small suitcase or backpack for travel.
- **Solid construction** - The Vibra-Tector's rugged sealed construction and stainless steel hardware are built to last.
- **Belt ring & wrist strap** - Includes a belt ring to attach to any common belt clip as well as a wrist strap for added security.

Vibra-Tector 730 Specifications

- Detection Type** • Pulse Induction
- Search Mode** • All metal
- Overall Length** • 17 inches (43 cm)
- Coil Diameter** • 4 inches (10 cm)
- Weight** • 1 lb. (450 grams)
- Power** • Standard 9 volt battery
- Warranty** • 1 year
- Battery** • Included
- Wrist Strap** • Included

Specifications are subject to change without notice.
